

MedDRA Version 12.0 Translations Will Be Available 15 March 2009

Dear MedDRA Subscriber:

The EU and Japanese translations for MedDRA Version 12.0 will be available **15 March 2009** via internet file download.

The download of MedDRA 12.0 will consist of one zip file instead of the traditional four zip files. The English translation download will include the Version Report, SMQ spreadsheet, and the Detail Report, which were previously available as separate downloads.

All versions and translations of MedDRA will include a new ASCII file in the set of MedDRA distribution files. The file, "meddra_release.asc," identifies the language and version of the MedDRA ASCII file set. The file will be used by the new MedDRA Desktop Browser (version 3.0 beta).

Your MedDRA User ID, Password, and Unzip Password are required for the download. The MedDRA User ID and Password authorize you to access the subscriber area of the MSSO Web site www.meddramsso.com. The Unzip Password allows you to extract the MedDRA files from the zip file onto your computer. Step-by-step instructions for the download process are available on our web site <http://www.meddramsso.com/MSSOWeb/started/index.htm> should you need assistance.

For additional questions, please contact the MSSO Help Desk via email msohelp@ngc.com or via telephone at 1-877-258-8280 (ATT Worldwide).

Sincerely,

MedDRA MSSO
