

Updated “Points to Consider” Documents Based on MedDRA Version 12.0 Are Now Available

Dear MedDRA Subscriber:

On behalf of the ICH M1 “Points to Consider” Working Group, the MSSO is happy to announce the posting of updated versions of both the “MedDRA Term Selection: Points to Consider” and the “Data Retrieval and Presentation: Points to Consider” documents.

MedDRA users should note that the “Data Retrieval and Presentation: Points to Consider” document has been extensively revised with an expanded section on queries, including Standardised MedDRA Queries (SMQs).

Additionally, examples in both updated documents reflect changes based on MedDRA v12.0.

The updated documents can be found at <http://www.meddramssso.com/MSSOWeb/activities/PTC.htm>

As always, the MSSO welcomes your feedback on both “Point to Consider” documents. Please submit your comments to mssohelp@ngc.com.

Thank you for your continued support.

MedDRA MSSO
