

CTCAE v4.0 is Available for Public Comment

Dear Subscriber:

On behalf of the Cancer Therapy Evaluation Program (CTEP) of the National Cancer Institute (NCI), the MSSO announces the release of the draft revision of the Common Terminology Criteria for Adverse Events (CTCAE v4.0) for public comment. The MSSO has participated in the CTCAE revision project with NCI to produce a MedDRA compatible version of the CTCAE. The new version of the CTCAE has MedDRA LLTs as its base terms. This new version will remove the need for a mapping from CTCAE to MedDRA. Please find the relevant information below:

- To download the draft revision of CTCAE v4.0 , please go to
 - <https://cabig-kc.nci.nih.gov/CTMS/KC/index.php/CTCAE>
 - or
 - <http://ctep.cancer.gov>, under CTEP highlights
- To submit comments, please email to ctcae4@bah.com

Please note that the comment period ends on **10 April 2009**. For questions, please contact Ranjana Srivastava at ctcae4@bah.com.

Thank you,

MedDRA MSSO
