

## **NEW OFFERING: Become a Certified MedDRA Coder (CMC)**

Would you like to distinguish yourself from other MedDRA coders out there? Get certified in MedDRA coding from the MedDRA experts.

To become certified, you will need to pass a rigorous online examination that will test your knowledge of the ICH-endorsed MedDRA coding guideline, the "[MedDRA Term](#)

[Selection: Points to Consider](#)" document. Upon passing the examination, you will receive a CMC certificate that will be valid for two years. Once your certificate expires, you may take the examination again to become recertified for another two years.

Think you may be ready to become a CMC? Take a look at the [MSSO's sample examination questions](#) first to see if you are ready. Reviewing the sample examination questions may help you focus in on what parts of the "Points to Consider" document you may need to study more.

There is no better way to demonstrate your MedDRA coding expertise than to become a CMC. To start your path toward CMC certification, please visit the [CMC Web page](#).

Good luck!
