

Updated MedDRA Desktop Browser Release 3.0.1b Available

Dear MedDRA User:

The MedDRA MSSO is pleased to announce an update to the MedDRA Desktop Browser designated as Release 3.0.1b.

Included in the update are:

- An updated History file is included with each MedDRA terminology release and is automatically loaded with the English version.
- Additional synonyms added to the Synonym List
- The **Select SMQ to Search** provides the ability to focus term searches to one or more SMQs to aide in narrowing the search parameters.
- Term History displays version numbers with a hyphen, such as 12-1, to accommodate languages that use commas to indicate a decimal point
- Deletion of all temporary data files created by MDB when closing the Browser
- Inactive PTs in SMQs are highlighted in yellow

MDB 3.0.1b is available now and can be downloaded at:

http://meddramsso.com/subscriber_download_tools_browser.asp

Thank you,

MedDRA MSSO
