

European Informal MedDRA User Group Webinar Meeting

To be Held 18 January 2012

Dear MedDRA User:

The next meeting of the European Informal MedDRA User Group will be a webinar held on Wednesday 18 January 2012. The theme of this meeting will be “MedDRA Searching and Browsing, Autoencoding and Synonym List Set Up and Maintenance” and will include the following topics:

- MedDRA searching and browsing strategies
- Synonym list set-up and maintenance
- Auto-encoding and auto-encoding algorithms
- Question and Answer Session

The webinar is scheduled from 1400 – 1530 hrs Central European Time (0800 – 0930 hrs US Eastern Time). The meeting is open to all MedDRA subscribers free of charge on a “first come – first served” basis.

Questions can be submitted in advance of the meeting to eu.informal.ug@gmail.com.

This webinar provides a valuable opportunity to interact with other MedDRA users and hear and share their experiences. It is organized by the European Informal MedDRA User Group (technical support provided by the MedDRA MSSO).

If you would like to join the webinar, please submit a request through the [MSSO Help Desk](#). As the number of participants is restricted, please make sure that for each organization, no more than three attendees from different geographical sites register for the meeting.

Note that a webinar for the previously described “coding related inspection readiness” topic will be postponed until July 2012 to allow time for the User Group organizers to recruit speakers.

Thank you,

The European Informal MedDRA User Group
