

Proposed Complex Changes for MedDRA Version 14.0

Dear MedDRA User:

The MSSO has posted [proposed complex changes](#) for MedDRA Version 14.0 on our Web site. Complex changes are any changes to the MedDRA hierarchy, i.e., the high level terms (HLT), high level group terms (HLGT), or system organ classes (SOC), which may impact your use of MedDRA. We encourage your comments (both for and against) these proposed changes so we understand their potential impact.

The deadline for your response to the proposed complex changes is 30 July 2010. Please send your comments to MSSORequest@ngc.com.

Thank You,

MedDRA MSSO
