

## Suspended Investigation Term Update

(Updated 24 Sept. 03)

The MSSO has approximately (129) suspended change requests that are related to Investigations. These requests were suspended awaiting the **Blue Ribbon Panel** input and MedDRA Management Board approval. The Management Board recently directed the MSSO not to take action on the suspended terms at this time. They would like, instead, for the MSSO to assess the Logical Observation Identifiers Names and Codes (LOINC®) Database for guidance on specificity of terms in the Investigations SOC and/or the possibly of incorporating the terms into MedDRA. Until the LOINC review is completed and the Management Board provides further direction, the (129) change request terms will remain on suspension.
